

<p>Product images</p>	 																																																																								
<p>Brief description</p>	<p>A powerful LED spotlight in monochrome and RGB versions which is integrated into the end sections of the wall and corner pillars, as well as the device support. The beam of light emerging from the front face of the profile is generally directed towards the ceiling, and produces a fascinating light reflection on the wall – in particular during the dynamic colour changes. The power is supplied and the cube activated using the 24-volt power supply unit and the controller/dimmer from the AmbientTrack range. The extraordinary combination of light with sockets, loudspeakers and other connections underlines the innovative character of the AmbientTrack system and illustrates the intrinsic value of the entire installation.</p>																																																																								
<p>Product benefits</p>	<ul style="list-style-type: none"> • Power LED technology • Spots produce a unique light reflection (side light) • Available in monochrome or RGB version • Different colour combinations possible 																																																																								
<p>Combinations/components</p>	<ul style="list-style-type: none"> • Wall pillar • Corner pillar • Device support
