

<p>Product images</p>		
<p>Brief description</p>	<p>The corner pillar is also fully made of aluminium and can be installed at half-height or room height in corner spaces. It boasts the same installation options as the wall pillar, and is also well suited for vertical installation over several floors. The same cover panels are used as for the wall pillar. The corner pillar provides the option of backlighting the shadow gap using the AmbientTrack LED strips, as well as installing the AmbientTrack LED spotlights or placing the rotating LED cube on top.</p>

<p>Product images</p>	
<p>Brief description</p>	<p>The same aluminium covers are used for the wall duct, corner duct, skirting board duct and the flat wall duct baseboard. There are two standard surface finishes (natural anodised and stainless steel). The covers are clipped onto the baseboard without screws. To match the various installation products and light modules, there are covers with the corresponding perforations. A special design feature is the frame-free installation of standard switch systems.</p>
